boxed water helps lung cancer

Ever need an ashtray but all you have is a lot of empty boxed water containers? Well why not use them to throw away and rest those cancer causing sticks we call cigarettes its simple and easy to make and keeps cigarette butts from being thrown on the ground left to pollute the world. This up cycles water box helps the earth for a short time by trapping all the harmful cigarette butts in a container that will not degrade over time so when you threw this ashtray way for good the butts will be nice and safe not leaking there poison into are water supplies. It is a win win for big tobacco and boxed water and looks very trendy and hip for the cool hip teen who is using this ashtray.
